

CIPRIANI
RESIDENCES MIAMI

The Cipriani legacy began when Giuseppe Cipriani Sr. opened Harry's Bar in Venice in 1931. Warm and inviting, the small room was soon crowded with artists, aristocrats, and writers who came for the martinis and stayed for the conversation. As it attracted everyone from Ernest Hemingway to Katharine Hepburn, Harry's became famous for its charming atmosphere and discreet, anticipatory service. To the delight of his patrons, Mr. Cipriani is credited with the invention of carpaccio and Bellini cocktail, both of which have become key trademarks of the Cipriani dining experience. Since the opening of legendary Harry's Bar in Venice in 1931, four generations of the family have developed Cipriani into a leading international hospitality brand with restaurants, landmarked event spaces, hotels and private membership clubs around the world.

A PERFECT
PARTNERSHIP

DEVELOPER

MAST CAPITAL

Mast Capital is a privately held real estate investment and development company founded in 2006. Headquartered in Coconut Grove, Mast Capital's existing and past investments are diversified across multiple property types. Successful past developments include:

- Louver House, a residential condominium development in the prestigious South of Fifth neighborhood in Miami Beach, which sold out in 2018
- Waterline Miami River, a 688-unit rental property positioned in a central location along the Miami River. The development achieved 100% leased within 9 months

Mast Capital has an exciting pipeline of development projects, with four projects slated to break ground later this year::

- The Perigon Miami Beach, 5333 Collins Avenue, an ultra-luxury condominium development comprised of 82 residences designed by Office of Metropolitan Architecture, founded by Pritzker-prize winning architect Rem Koolhaas. Mast Capital partnered with Starwood Capital to bring this vision to life
- 3900 Alton, a luxury apartment community in Miami Beach with 176 units being developed with Rockpoint Group
- Miami River Phase II, Mast Capital broke ground on the second phase of Waterline Miami River in early 2022, and will provide more housing in an emerging market
- Mast Capital has additionally made investments in the Tampa market, though focuses primarily in the Miami market

DESIGN TEAM - A PERFECT PARTNERSHIP

Coming together in perfect partnership, the architectural and design vision is brought to life by two iconic practices with an innate understanding of Miami and the Cipriani brand spirit.

ARQUITECTONICA

Arquitectonica was founded in 1977 by Bernardo Fort-Brescia and Laurinda Spear. The award-winning firm has worked in 59 countries, but left its strongest mark on Miami, where it has transformed the skyline with a bold vision of contemporary architecture.

Known for expressive, humanistic designs, Arquitectonica has captured the city's singular spirit, apparent in early sensations like the Pink House and the Atlantis, and modern landmarks like Brickell City Centre. The curved, organic form of Cipriani Residences Miami is the latest example of the firm's trademark panache.

ARQUITECTONICAGEO

ArquitectonicaGEO is an award-winning design studio specialized in landscape architecture, planning, and urban design established in Miami in 2005 by Laurinda H. Spear and Margarita Blanco. We have built a reputation for developing and designing innovative, long-term, and resilient solutions for our clients. Our designs are planned, built, or modified to promote sustainable living and resilience. We collaborate with architecture firms, engineers, developers, private enterprises, public agencies, and hospitality brands all over the world to create dynamic and functional destinations by effectively integrating landscape into the built environment.

INTERIOR DESIGNER

1508 LONDON

1508 London is a design studio specializing in design of high-end private residences, luxury & boutique hospitality projects, residential developments, as well as yachts. Born out of the idea of perfection in design, their name is derived from a moment in time during the year 1508, when Michelangelo was commissioned to paint the frescoes on the ceiling of the Sistine Chapel.

Deeply rooted with a collaborative approach, their designs are drawn from measured principles, inspired by history, geography and the local architectural vernacular. Their expertise extends across all stages of design and construction, ensuring each project is finished to the highest level of quality. With offices spanning across four continents, 1508 London offers a world-leading service of best-in-class design.

NOT TO SCALE. Stated square footages and dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the square footage and dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes all interior structural components and other common elements). This method is generally used in sales materials and is provided to allow a prospective buyer to compare the Units with units in other condominium projects that utilize the same method. For your reference, the area of the Unit, determined in accordance with these defined unit boundaries, is set forth on Exhibit "3" to the Declaration. Measurements of rooms set forth on this floor plan are generally taken at the farthest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts or variations. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length and width. All dimensions are estimates which will vary with actual construction, and all floor plans, specifications and other development plans are subject to change and will not necessarily accurately reflect the final plans and specifications for the development. All depictions of appliances, counters, soffits, floor coverings and other matters of detail, including, without limitation, items of finish and decoration, are conceptual only and are not necessarily included in each Unit.

Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length and width. All dimensions are estimates which will vary with actual construction, and all floor plans, specifications and other development plans are subject to change and will not necessarily accurately reflect the final plans and specifications for the development. All depictions of appliances, counters, soffits, floor coverings and other matters of detail, including, without limitation, items of finish and decoration, are conceptual only and are not necessarily included in each Unit.

Stated square footages and dimensions are measured to the exterior boundaries of the exterior walls and the centerline of interior demising walls and in fact vary from the square footage and dimensions that would be determined by using the description and definition of the "Unit" set forth in the Declaration (which generally only includes the interior airspace between the perimeter walls and excludes all interior structural components and other common elements). This method is generally used in sales materials and is provided to allow a prospective buyer to compare the Units with units in other condominium projects that utilize the same method. For your reference, the area of the Unit, determined in accordance with these defined unit boundaries, is set forth on Exhibit "3" to the Declaration. Measurements of rooms set forth on this floor plan are generally taken at the farthest points of each given room (as if the room were a perfect rectangle), without regard for any cutouts or variations. Accordingly, the area of the actual room will typically be smaller than the product obtained by multiplying the stated length and width.
